

MICHAEL S MCNEILL

Applied Mathematics & Computer Science Double Major

@ michael.mcneill@stonybrook.edu

860-990-0718

Stony Brook, NY

in michaelmcneill

EXPERIENCE

Undergraduate Researcher

File Systems and Storage Lab

June 2021 – Present

Stony Brook, NY

- Working on Kernel Machine Learning and Re-Animator Projects.

Teaching Assistant for Programming Abstractions

Stony Brook University

Jan 2020 – May 2020

Stony Brook, NY

- Conducted weekly recitation section for students, teaching concepts and examples from various programming languages.
- Worked directly with students during office hours to assist with understanding and completion of assignments.
- Created review materials for midterm and final exams.

Software Development Intern

Cubicle Enterprises LLC

Oct 2018 – Feb 2019

Elmsford, NY

- Created a Python Flask REST API for a generative design platform contracted to a major manufacturing and licensing company.
- Extensively used git for version control.

PERSONAL PROJECTS

Grayscale Image Utility

C

February 2021

- Converts files to/from pgm, ascii and birp formats.
- Allowed for transformations on the binary decision diagrams underlying the birp format.

Rubik's Cube Scramble Viewer

Python

October 2018

- Developed Rubik's Cube software which maps representations of turns to a digital abstraction with perfect accuracy.

HACKATHONS

BedsideManner

JavaScript/HTML

September 2020

- Offers hospital patients a more considerate, hospitable interactions with doctors, nurses, and other workers that visit them during their treatment.
- The website provides them with logistical information, as well as a photo and some facts about the worker in order to build a more personal connection.
- Worked on the client side JavaScript, allowing for communication between the front and back end.

LANGUAGES & SKILLS

C

Java

Python

JavaScript

OCaml

git

bash

mySQL

Flask

CSS

EDUCATION

B.S. in Applied Mathematics & Computer Science

Stony Brook University

Aug 2018 – May 2022

3.92 Cumulative GPA

Relevant Courses

- Analysis of Algorithms
- Computational Geometry
- Computer Networks
- Data Structures
- Differential Equations
- Fundamentals of Software Development
- Linear Algebra
- Multivariate Calculus
- System Fundamentals II
